- Mining load scoop cutting edge - has turnable corner pieces, reinforcements for straight cutting edges and centre part with projecting teeth points

(SE8200607) The front cutting edge is for a load machine scoop and is used in mining. It comprises a turnable corner piece at each lateral extremity which replaces corner teeth and a pair of reinforcement profiles for the straight cutting edge parts. A centile piecewis. provided with some or more forwardly projecting teeth points. The different parts are welded to the scoop bottom plate, and in the corners against the scoop side plates.

> stärkningsprofil (21, 22) för raka skäreggsdelar samt ett mittstycke (25) försett med en eller flera i skärets arbetsriktning framstickande tandspetsar (26, 27). De olika delarna svetsas på sina platser mot skopans bottenplåt och i hörnen mot skopans respektive sidoplatar (9, 10).
